Unlock Up to \$1,250/Ton for Air Source Heat Pumps

Enhanced rebates available of up to \$1,250 per ton for customers with permanent, working electric resistance heat that update to qualifying air source heat pumps.

For homes that do not qualify for the enhanced rebate, a standard rebate of \$250 per ton still applies.

Please **scan this QR code** or visit
[NHSaves.com/heatingcooling](https://nhsaves.com/heatingcooling)
for more information and how to qualify.

Pre-verification of the existing heating system may be required.

**Air source heat pumps
can reduce electric
use by up to 65%***
compared to electric resistance
heating, offering significant
savings while maintaining
comfort, year-round.
