

PEACE OF MIND

ENERGY STAR Homes follow high standards and proven building practices set by the Environmental Protection Agency. Certified professionals inspect and test them to ensure better quality and efficiency.

BUILT TO LAST

Save money with energy-efficient heating and cooling equipment, a well-sealed home with proper insulation and high-performance windows, and energy-efficient lighting and appliances. Plus, a comprehensive water management system helps protect your home from moisture damage while enhancing overall efficiency.

WALL-TO-WALL COMFORT

Breathe easier with fresh, filtered air and reduced indoor pollutants and allergens. Enjoy a quieter home with consistent temperatures and fewer drafts for year-round comfort.

PROVEN VALUE

ENERGY STAR Homes are a smart investment for today and tomorrow. They use 15-30 percent less energy than typical new homes—and even more compared to most resale homes. These homes also retain better resale value if you decide to sell.

All ENERGY STAR Homes follow strict guidelines, verified by a third party certified Home Energy Rating System (HERS) Rater. The rater works closely with the builder throughout the construction process to help determine the necessary energy-saving equipment and construction techniques. On-site diagnostic testing and inspections ensure the home meets the requirements to earn the ENERGY STAR certification label. The ideal time to apply is before construction starts.

Electric Co-op**

 **Unitil**

The ENERGY STAR Homes program encourages New Hampshire residents to adopt energy-efficient practices in new home construction, offering rebates up to \$10,000 to help cover the costs.

WHICH NEW CONSTRUCTION PROGRAM IS RIGHT FOR YOU?

Choose from three new construction paths designed to maximize your home's energy efficiency and savings:

- Drive to ENERGY STAR Code Plus Initiative: Exceeds current code but does not meet full ENERGY STAR certification
- ENERGY STAR 3.1: A bonus incentive program for achieving ENERGY STAR certification
- Drive to Net Zero Challenge: Requires ENERGY STAR 3.1 certification and goes even further toward net zero energy performance

DRIVE TO NET ZERO CHALLENGE

This design-and-build competition awards customers, builders, and HERS Raters for building energy-efficient, net-zero energy homes. Homes entered in the Drive to Net Zero Challenge are also part of the ENERGY STAR 3.1 Homes program.

Prizes are awarded to the top three entries: \$5,000 for first place, \$2,000 for second and \$1,000 for third.
